
ARI JDIALOG mouse over link no hand display

Posted by mniederm - 2009/01/23 22:38

Hi,

I use ARIJDIALOG and it works great, there is only one little bug. When I move with the cursor over the link ('Notiz erstellen') the cursor is still a arrow and not a hand like it is on other hands.

What could be the problem?

Example: <http://www.aktionsfinder.at/aktionsfinder/meine-einkaufsliste.html>

--> you have to login with user: test pw: test

relevant part of the implementation:

```
{arijdialog width="560" height="260" title="Notiz" resizable="true" draggable="true"}  
{arijdcontent title="Modal dialog"}
```

```
{/arijdcontent}
```

```
{arijdocontent}
```
