hello guys

i am trying to wrap arisqltable with arijdatatable but in IE7 the display remamins the same - it shows no sortable columns or pagination, etc.

it's ok in firefox. is there a problem with the display in IE. how can it be corrected?

thanks

Hello,

ARI JDataTable supports IE 6+. May be it CSS conflict on your site. Can you say link where we can see this problem?

Regards,
ARI Soft
