Submenus not diplayed correctly

Posted by guruji - 2011/05/30 15:50

_____

Hi Guys,

I am really stuck at this one. I am using Joomla 1.6 . We have menu items upto level 3. Menu from level 1 and level2 are shown in module position top (in default joomla menu came) and Menu at Level 3 is shown in module position left.

For Menu at Level 3 (on left),we are using ARI YUI menu.

Issue is that at Level 3 all menu items are being displayed in menu irrespective of which choice of LEVEL 2 menu item we selected.

Your help in this regards is highly appreciated.

_____

Hello,

Check that "Show only active sub-menus" parameter is set to "Yes".

Regards,
ARI Soft

Hi ,

Thanks a ton for such a quick response. I have tried ur suggestion, still its showing all the menu items at level 3 instead of displaying menu items related only to the menu item at level 2.

With Best Regards
Yogesh

_____

We can investigate the problem if you provide temporary access to your Joomla! backend by email and link to page where we can see the problem.

Regards,
ARI Soft

Hi,

As this site is under development on my local system , I will be unable to grant the access. Instead I am providing some screenshots that may enable you to understand the issue better.

With Best Regards
 Yogesh http://www.ari-soft.com/images/fbfiles/images/Menu_display.jpg
