
Menu centering

Posted by liceorussell - 2011/07/14 10:02

I have read many of your threads but still can not understand why I am not able to center the menu in my css.

I am sure it is something silly that needs to be overridden.

Here is the link: <http://www.liceorussell.eu/test/>

Hello,

Try to use the next CSS rules:

```
body #ariyui49.yui-skin-sam .yuimenubar
{
    background: none transparent;
}
```

```
#ariyui49_menu
{
    text-align: center;
}
```

```
#ariyui49_menu .bd
{
    display: inline-block;
    zoom: 1;
    *display: inline;
}
```

Regards,
ARI Soft

This worked great!

I added it to the safe_menu_rtl.css and safe_menu.css CSS files

If you are every in Italy Pizza is on us!

Cheers

Walter

I know I may asking too much...

But is there anyway we could hide that last white line after the last menu text?

Add the next CSS rule:

```
LI.yuimenuitem-item226
{
border-style: none !important;
}
```
