## Need help with Configuring CSS to run

Posted by wcjgraphics - 2011/09/07 19:12

---

I am trying to duplicate the menu displayed on this demo-site in my clients new joomla site. I am using the ARI YUI Menu, but am confused on how to get this CSS configuration to work within ARI YUI. Please guide me. I am new to joomla  
<http://mywebselect.com/apothier/>

Hello,

Information about menu HTML layout and CSS classes can be found here. It can be used to customize menu design.

Regards,  
ARI Soft
