
Adding images to YUI submenu

Posted by jonski - 2011/09/20 10:47

Hi, I'm in the process of replicating an unusual menu style for a client (example of the menu here: <http://arjunawholefoods.co.uk/>) using the YUI menu. I can get the menu to pop up (rather than drop down) but can't find where to add the bottom and top images to create the rounded look and the call out arrow. Is there a way of adding a top and bottom image that will create the rounded look?

The dev site is: <http://arjuna.sway-search.co.uk/>

Am I trying to do something that the menu can't support?

Thanks in advance for your help.
