Submenu In IE7

Posted by nlcorreia - 2011/10/11 11:02

_____

Hello, I'm using vertical ARI Menu but in IE7 the submenu items appears beehind the content. Any help? I dont have a link because I'm developping on local machine.
I'll send a page source in attachment.

Regards,
Nuno Correia.

_____

Hello,

Send page files (including image, javascript and CSS files) of a page with the menu by email. This process is described here.

Regards,
ARI Soft

_____

Thanks for the reply. I already have find a similar solution in the forum. I have to apply z-index in the template navigation and contentarea section, and works fine.

Many thanks.

Best regards,
Nuno Correia
