Custumize my menu
Posted by Shiv@n - 2011/10/12 09:50

_____

Hello,

I just found your YUI Menu and it seems to fit my goals, so I want to thank you.

I want to custumize the menu in several ways :

- I want to "vertical-align:middle" the menu labels "accueil/le club/...".
- Where can I modify font-color/back-color/font-size, ... for the menu ? For the sub-menu ?
- It seems to be a little problem when hovering the "Le club" menu, I can't go to click the sub-menu it desappear as soon
as the manu lost focus... How can I modify the "top" value for the sub-menu ?

Thank you for your help and for your tool !!!

Ok, I managed to to it slowly, piece by piece.

One question anyway, how may I modify the height of the "cell" menu ?

_____

Hello,

Information about menu HTML layout and styles can be found here. It should be useful to customize the menu.

Regards,
ARI Soft

Thanks for your response.

I have a new question, always on the customization of the menu.

www.ligugeennefootball.fr

I would like to set a new color on submenu "hover". For the moment, it is too light and we hardly see the difference
between a sub menu selected/active or not... We can see a very light color coming over, but too light...
I would like to change the backgound color/font-color so it can be very visible.

Thanks again for your help !

_____

Use the next CSS rule:

body #ariyui33.yui-skin-sam UL LI A.yuimenuitemlabel-selected
{
 color: red;
 background: none yellow;
}
