center the menu
Posted by nadine - 2011/10/25 14:34

_____

Hello,

How can I center the menu on http://www.tv76.nl/
So that the menu items are automaticly divided in such a way that there is a equel space on the right and left of the menu.
I'v already tried some stuff.
My last attempt was:

BODY #ariyui80.yui-skin-sam LI A
{
 text-align: center !important;
}

 :(

Can you help me??
Thanks in advance

_____

Hello,

Could you provide a screenshot where we can see what do you want to achieve?

Regards,
ARI Soft

_____

I hope this image makes it a little bit clear.
I would like that the pace at the black arrows atomaticly are te same.
That the menu centers.

When I do it with padding its looks okay in Firefox and Safari. But not in IE9.
When I make sure it looks okÐ¹ in IE9 it looks like this in Safari and Firefox.

Is it clear like this??
Thanks for you help!

_____

Add the next CSS rules:

```
#ariyui80
{
 text-align: center;
}

#ariyui80_menu
{
 display: inline-block !important;
 zoom: 1;
 *display: inline !important;
}

body #ariyui80 .yuimenubar > .bd > ul:after
{
 width: auto;
}
```

Regards,
ARI Soft
