Smaller left margin on vertical menu

Posted by janeinpa - 2011/11/14 17:21

_____

I thought I'd find this posted somewhere, but I can't. How do I make the left margin smaller on the vertical menu so I can use longer menu item names? In other words, I want the vertical menu items to move left about 10 or 20 pixels.

Must I make this css change in EVERY ari yui menu I have on the site? Isn't there a way to change the css in one place?

Thanks.

Hello,

Could you provide a screenshot where we can see what do you want to achieve and a link to a page where we can see a menu on your site?

Regards,
ARI Soft

_____

Yes. For example, http://www.sdst.org/index.php?option=com_content&view=article&id=487&Itemid=216

The Ari Yui menu is the vertical Curriculum menu on the left. If you scroll down, you see Graduation Requirements touches the border on the right side of the menu. I want to have less space between the text and the border on the left.

_____

Add the next CSS rule:

body .yui-skin-sam .yuimenuitemlabel
{
 padding-left: 10px
}
