Stupid Question I\'m sure

Posted by kaytee - 2009/08/14 19:14

I'm trying to use this menu - it looks great. But when I enabled it - the menu went in a box on the left hand side of the page. I'm trying to have the Ariyuimenu as the top menu. I'm new to Joomla, and definitely new to php.

Please help!

Hello,

Could you provide link to page with ARI YUI Menu that we can investigate this issue?

Regards,
ARI Soft
