Menu Item Alignment and adding Text

Posted by kcjones - 2011/12/29 16:44

_____

Great module! One thing i can't seem to do is align the menu items in the ARI YUI menu module so that my items appear in the right of the menu bar and not the left. Could someone point me to where i need to make the change or what CSS code need to be added to make this work? Also, i would like to add some teaser text in the left side of the menubar so that i have text on the left and menu items on the right within the menubar. Could some please help me also add text within the menubar on the left.

Below is the link to my site that has the menubar displayed at the top of the page.
http://www.charmeckresourceportal.org/

Thanks

Kelvin

Hello,

Sorry for the delay. Could you provide an image where we can see what do you want to achieve?

Regards,
ARI Soft
