change the font

_____

HI, congratulations for the menu
1) how can I change the fonts of the menu and the 2Â° and 3Â° level menu backgrounds ?
2) With IE 7 sub menus are displayed under the menu to the right even if z-index is correct.

site: http://www.phoebus.it/index.php?option=com_content&view=article&id=1&Itemid=104&lang=it

thanks

==

Re:change the font

_____

Hello,

1. Try to use the next CSS rules:

.yuimenu UL UL LI A
{
 background-color: red !important;
}

.yuimenu UL UL LI A:hover
{
 background-color: yellow !important;
}

2. It doesn't look like a "ARI YUI Menu" issue. This problem with site templates HTML layout and styles (menus are located in elements which have absolute position). IE 7 calculates z-index in another way than other browsers for elements with absolute position. We can recommend to use IEDevToolbar addon for IE to investigate this problem.

Regards,
ARI Soft

Re:change the font

_____

Thanks but it did not work ...
You can send me the code to change the font?
Regards
Luca

Re:change the font

_____

Use the next CSS rule:

.yuimenu UL LI A
{
 font-family: Arial;
}

_____

Thanks but it did not work ...

I also tried
. Yuimenu UL LI A
{
 font-family: Forte !important;
}

_____

If open HTML source of "PRODOTTI" page, it doesn't contain CSS rule which we provided. It seems you entered code in incorrect place.

_____

I put the code in the site testing
http://www.lombardiashop.info/index.php/it/prodotti

into menu Information&Comunication

_____

"CSS Styles" contains an incorrect code. Use CSS rule which we provided in this post.

Regards,
ARI Soft
