
Changing position of submenu dropdown

Posted by anijack - 2012/01/17 16:37

Hi,

Does anybody know how to define the position of the dropdown submenu boxes. What I need to do is push the dropdown boxes down about 10px.

Thanks,
Jack

Hello,

Provide a link to a page where we can see a menu and a screenshot where we can see what do you want to achieve.

Regards,
ARI Soft

Add the next CSS rule to "CSS Styles" parameter in module settings:

```
#ariyui82 .yuimenu {  
padding-top: 12px !important;
```

}

Regards,
ARI Soft
