
Remove border and change text color when hovered

Posted by ari yui - 2012/01/21 17:10

Ive tried a few of the CSS lines mentioned in previous posts, but cant seem to get it to work. But i hope you can provide me with the necessary css to do the following two things:

- Remove the border around my main menu (ONLY the main items, not the sub-items..)
- Change the color of the menu item's text when its hovered instead of highlighting the entire button

The menu can be found here: camping.doualumi.com

I hope this is at all possible. Thank you for your help.

Hello,

Provide a link to a page where we can see a menu.

Regards,
ARI Soft

I did provide the link in the initial message right? Its on a subdomain until finished:

<http://camping.doualumi.com/>

Sorry, but it is impossible to open provided link. Probably it is available only for specific IP addresses.
