Transparent background

_____

HI

Is there a way I can have the text background transparent?

Here's a link to my test site. You'll see the Ari Yui menu at the bottom of the page.

http://www.rowbycomedies.com

I suppose I could just give the button the same color as the background. But let me know if I can just make the button transparent (even though I may lose some of the hover effect.

And no borders.

Basically I want a menu that looks more like the below:

| Home | Contact Us | About Us |

P.S. Also is there a way to have individual menu items open in a new window? For example in the above can I have only "About Us" open in a new window when clicked.

Thanks again!

Thanks!

Rowby

Re:Transparent background

_____

Hello,

1. Use the next CSS rules:

```
body #footer .yui-skin-sam .yuimenubar
{
 background: transparent none;
}

body #footer .yui-skin-sam .yuimenubar,
body #footer .yui-skin-sam .yuimenubar A
{
 border-style: none !important;
}
```

2. It is not possible to change "target" attribute for a specific menu item.

Regards,
ARI Soft

Re:Transparent background

_____

Hi I put your code into the module's css panel. But it does not seem to have an effect.

Perhaps one of my other styles, in my joomla style sheet, is "blocking" it.

Here's the link again to the test site:

http://www.rowbycomedies.com

They are the links on the bottom blue area.

I tried looking at it in firebug, but can't figure out the conflict.

Thanks!

_____

It seems you have changed site template. Use the next CSS rules:

body .rowby-footer .yui-skin-sam .yuimenubar
{
 background: transparent none !important;
}

body .rowby-footer .yui-skin-sam .yuimenubar,
body .rowby-footer .yui-skin-sam .yuimenubar A
{
 border-style: none !important;
}

_____

Hi

Sorry to keep on this issue.... But some fine tuning for the following test site:

http://www.rowbycomedies.com/

I am using your menu twice on the bottom as my bottom text link menu.

If I can get your help on one of them I can transfer your s0lutions to both menus.

(I have finally stabilized my joomla templates and am using only one for now on :))

Below is the css I put into the Ari Yui Menu css field.
body .rowby2columnfooter-text .yui-skin-sam .yuimenubar
{
 background: transparent none !important;
}

body .rowby2columnfooter-text .yui-skin-sam .yuimenubar,
body .rowby2columnfooter-text .yui-skin-sam .yuimenubar A
{
 border-style: none !importan
}

I would like to:

1) Remove the bullets.
2) Remove the hover color effect (keep the hover transparent.
3) Remove the top and bottom border. Just keep the right and left borders.

Also I notice on the menu that there is an empty cell on the right. Is there a way to get rid of it?

Finally, can I center the text between the two right and left borders. Right now the text is flush left for each menu item.

I assume I can just use some special css to center the text, but am checking if you have a "shortcut" to center the text.

Thanks

_____

Add the next CSS rules:

body .rowby2columnfooter-text .yui-skin-sam .yuimenubar LI
{
 background: transparent none !important;
}

body .rowby2columnfooter-text .yui-skin-sam .yuimenubar,
body .rowby2columnfooter-text .yui-skin-sam .yuimenubar A
{
 border-style: none !important
}

_____

Sorry to keep bothering you. I have decided to get rid of all borders. Specifically the right border that separates the items.

I would do it myself but it appears in your css you are already saying no borders, so I am not sure what would turn off
that right border color (which is colored #808080.

Finally I want the text white (#FFFFFF) instead of black. Both on original visited and hovered.

And "finally" forcing a hand pointer for browsers that support a hand pointer.

Thanks!

Rowby

Below is the current code in the css panel.

```
body .rowby2columnfooter-text .yui-skin-sam .yuimenubar LI
{
 background: transparent none !important;
}

body .rowby2columnfooter-text .yui-skin-sam .yuimenubar,
body .rowby2columnfooter-text .yui-skin-sam .yuimenubar A
{
 border-style: none !important
}
```

_____

Add the next CSS rule:

```
body .rowby2columnfooter-text .yui-skin-sam UL LI
{
 border-style: none !important;
}
```

Thanks that's working (testing it on another domain -- the live domain.)

Can you finally give me the code for the cursor to be a hand instead of a pointer.

I tried some css on my own but it didn't work.

Thanks

Re:Transparent background
_____

Dear Ari,

i am trying along time ago for a transparent css in my ari menu without borders..

i used the code
body #footer .yui-skin-sam .yuimenubar

{

background: transparent none;

}

body #footer .yui-skin-sam .yuimenubar,

body #footer .yui-skin-sam .yuimenubar A

{

border-style: none !important;

}
but there was nothing changed. Maybe it has to do with my template (shape5_intrigue)
http://www.1fly.gr
Thanks
Nick

Re:Transparent background
_____

Hello,

Try the following CSS rules:

```
body#s5_body .yui-skin-sam .yuimenubar
{
 background: transparent none;
}

body#s5_body .yui-skin-sam .yuimenubar,
body#s5_body .yui-skin-sam .yuimenubar A
{
  border-style: none !important;
}
```
