
Transparent menu

Posted by Bikerman - 2012/01/26 11:17

Hi,
I've recently put a new template on my site and now my menus are transparent.
Could you tell me what I need to add to the css file in order to correct this and have the menu appear over the top of the content rather than transparently?

Site <http://bikerman.co.uk>

PS - thanks for the great product

Hello,

Add the next CSS rule to "CSS Styles" parameter in module settings:

```
.art-sidebar1
{
  z-index: 2;
  position: relative;
}
```

Regards,
ARI Soft

Thanks for that - as ever, prompt service, right on the button.

Chris.
