Submenu behind content in IE7

Posted by dtbao - 2012/03/24 03:48

_____

Hi,

The submenu behind content in IE7, other version 8, 9 are OK.

Thanks for your helping.

_____

Hello,

Add the next CSS rules to "CSS Styles" parameter in module settings:

```
#header .yui-skin-sam
{
 z-index: 2;
}

#header #pgsnivo-wrapper
{
 position: relative;
 z-index: 1;
}
```

Regards,
ARI Soft

_____

thanks for your helping.

It's OK, but I get another problem.

The separator submenu is not full of the submenu (only the text)

See this image:

_____

It seems this is a problem with site template styles. We can recommend to use IE DevToolbar addon for IE 7 browser to investigate an issue.
