Error log

Posted by rowby - 2012/04/30 19:57

Using Ari Yui menu in joomla 2.5.x Ari Yui version 2.0.5.

I see that Ari Yui menu keeps an error log "error_log" in the following directory:

/modules/mod_ariyuimenu/mod_ariyuimenu

Is there any way I can turn off that error log? It become a pretty big file.

Thanks

Rowby

Hello,

error_log file is not created by "ARI YUI Menu", it is created by web server. Contact hosting support so they disable it.

Regards,
ARI Soft
