
Dropdown Stopped Working

Posted by aclausen - 2012/06/08 18:10

We've been using the ARI YUI menu for a drop down menu for about four or five months without problem. This morning I had to fix some issues with some other extensions, and all of a sudden the dropdown isn't working any more. Set to horizontal, it shows a horizontal menu beneath the main top menu in question, set to vertical it shows a horizontal menu over top of the main menu.

<http://avemployment.ca/>

Can anyone help me fix this. I just want a straight drop down menu here.

Hello,

Sorry, but we can't open the page.

Regards,
ARI Soft
