Start Level

Posted by ManuSP - 2012/08/01 08:47
_____

Hi, in my site : http://keygraphicmedia.fr/verneuil/decouvrir-verneuil
I want the start level in ARI YUI menu is the same when I clic in any item of the main submenu.
In this page : http://keygraphicmedia.fr/verneuil/decouvrir-verneuil, The ARI menu is OK,
but, in this page : http://keygraphicmedia.fr/verneuil/decouvrir-verneuil/ville-des-yvelines,
I want de same menu, and not just "ville des Yvelines".

Thanks

PS : Sorry for my broken English

_____

Hello,

Set "Show only active sub-menus" parameter to "No".

Regards,
ARI Soft

_____

Hello,

if I make "Show only active sub-menus" parameter to "No" : I see All item of the menu...

I just want to see all items to the menu (parent) when I choose one item...

Thanks for your help

Manu

_____

The module doesn't work in this way. You can try "ARI Ext Menu" module.

_____

I try this, but it's the same.

When I click on the first sub level : it's ok
When I click on the second sub level, It's wrong...
Only the parent item is displaying

I want that the all item of the first sub level appears, when i clic anywhere in this sub level

Thanks

Manu

_____

OK
can you indicate me to another module with this feature, thank you
