border and padding/margins
Posted by laurabat - 2012/10/23 21:23
_____

I've been trying to remove the border around the menu using previous threads in this forum, but no luck.

Page is here: http://108.179.244.188/~ddoglaw/. Ari Yui menu is the vertical 'dangerous dog litigation' menu. I'd like to remove the border and reduce the left padding/margin of the menu items (so it looks more like the resources menu below).

Thanks for any help.

L

Hello,

Add the following CSS rules:

#Mod113
{
 width: 180px;
}

body #ariyui113.yui-skin-sam>.yuimenu>.bd
{
 border-style: none;
}

Regards,
ARI Soft
