## Text problem

Posted by Lotar - 2013/01/13 11:46

---

Hello.

The menu works great except of one thing. I have to use long title, for example, "Equipment for building and reconstrating railways". Is it possible to transfer part of the text to the second row inside the same menu button? For example,

Equipment for building  
and reconstrating railways

Thank you

Hello,

Where we can see menu?

Regards,  
ARI Soft

Thank you for your reply.

The site is <http://simpleplus.ru/>. It's in Russian but I've renamed all of the left menu buttons (which is Ari Yui menu) in "Equipment for building and reconstructing railways". Please tell me if it's not enough, I can translate other parts of the site if needed.

Thank you.

Try the following CSS rule:

```
A.yuimenuitemlabel
{
  white-space: normal !important;
  line-height: 20px !important;
  height: 60px !important;
}
```

Thank you, it works great. One last question: is it possible to set "vertical-align: middle" for the menu text?
