
How do I make the menu work in RTL direction

Posted by alefmemalef - 2013/02/19 09:31

Hi,
Thanks for the module. I want to use it in an rtl website but cannot work out how to adjust the direction of the dropdown menu.
Thanx in advance

Hello,

Where we can see the problem?

Regards,
ARI Soft

Hi,

I have solved same problem. you just need to edit two files.
which are:

menu.fix.css
menu.min.css

You can find both files to YOUR JOOMLA SITE / modules / mod_ariextmenu / mod_ariextmenu / js / css

now you should all float: left to float: right change and save

good luck
