Words wrapping in sub-menu
Posted by anijack - 2013/03/07 15:02

_____

Hi

I am having a problem with words wrapping in drop down menus only in firefox and it only happens 50% of the time.

http://www.ari-soft.com/images/fbfiles/images/wordWrapping.jpg

I found this post http://www.ari-soft.com/ARI-Ext-Menu/33858-sub-menu-auto-width-makes-the-text-wrap.html#33858 which suggested using white-space: nowrap; on the drop down 'A' tags. However this makes the text push outside of the drop down box. Can you suggest what could be causing this issue.

Let me know if you want access to the site and I will PM you the link with the development servers username and password.

_____

This is what happens with the suggested CSS code applied.

UL.ux-menu LI A
{
white-space: nowrap;
}

_____

Hello,

Send a link to a page where we can see the problem by email.

Regards,
ARI Soft

_____

What browser do you use? The menu looks fine for us in FireFox browser:

_____

Hi

I am using Firefox 19.0

Sorry I thought I made it clear in my initial post that you need to refresh the page a few times to see it happen. 50% of the time it is fine, and 50% of the time the issue occurs. I reproduced it just now after the third refresh (waiting for refresh to finish then hitting refresh again).

_____

Try to set "Load method" in module settings to "On load" value.
