## Changing menu background color and hove color

Posted by gezzam - 2010/04/20 01:26

---

Hi,

New to Joomla and this menu. I have it working OK, however I would like to change the background color of the menu when you hover over it.

Could you please point me in the right direction? I have looked through the documentation, however it's quite confusing for a novice programmer.

Website is at <http://new.simplyflowerpower.com.au/>

Thanks,

Gerald

Hello,

You can add the following CSS rules:

```
.yuimenuBarItemLabel-selected
{
    color: red !important;
}
```

```
.yuimenuBarItem-selected,
.yuimenuItem-selected
{
    background-image: none !important;
    background-color: yellow !important;
}
```

Regards,  
ARI Soft
