## Menu problem

Posted by dal - 2010/04/28 10:27

---

Hello

I am new to Joomla and have been trying without luck (I'm sure due to my lack of Joomla knowledge!) to get the drop down menu system working. I have installed the module and selected topmenu, however I am not seeing any drop down menus. If features is clicked I believe the ARI YUI module shows beneath. What I am trying to acheive is show drop downs when I hover over Features for the time being.

Thanks in advance.

Hello,

Have you enabled menu module? We don't see 'ARI YUI Menu' on your site.

Thanks for the quick resonse.

Yes, it seems to show something behind the top menu when I click on Features, grab attached for your module

It problems with your template styles. It contains specific styles for this position. If you have knowledge of CSS, you can see it in FireBug plugin for FireFox browser. You can add the following CSS rule to template CSS file that show 'ARI YUI Menu':

```
BODY #pillmenu,
#pillmenu .yuimenuubar ul,
#pillmenu .yuimenuubar ul li,
#pillmenu .yuimenuubar ul li a
{
    height: auto;
}

#pillmenu .yuimenuubar ul {
    width: auto;
}
```

---

```
#pillmenu .yuimenubar ul li {  
  background: none;  
}
```

Thank you.

That has kind of sorted the issue, however I only see the module when I click on the Features tab, what I was hoping to achieve would be hover over the existing Features and have drop down menus shown.

---

It seems you have set in module settings that it's shown only on 'Features' page. If you want to display the module on all pages, open module settings page and choose 'All' radio button for 'Menu Assignment->Menus' field.

Thank you again.

Hopefully this will be the last question, I want to replace the topmenu which was there with yours and then change the way yours looks to display similar to that which is currently there.

---

You can disable you current top menu module and update 'ARI YUI Menu' styles that it looks like your current module, but it requires some CSS knowledge. You can read about 'ARI YUI Menu' styles in this post.
