
Menu item highlighted when mouse not over it

Posted by ParinaChica - 2010/04/29 09:47

Hello

I installed the menu bar yesterday and really happy with it except that when a page first loads the left hand menu item is highlighted as if the mouse is over it.

Any idea how I can stop this happening?

Many thanks

Rebecca

:(Just noticed another problem. In Firefox, when you mouseover the two right hand menu items, the submenu items appear but disappear if you move the mouse onto them... In Explorer it works fine.

Hello,

Provide link, please, where we can see this issue.

The site is password protected - can I email you the password?

Thanks for the quick reply.

It's problem with template CSS styles. Add the following CSS rules to your template CSS file:

```
#wrapper_r
{
  position: relative;
}
#tabarea
{
  position: relative;
  z-index: 1;
}
#search
{
  position: relative;
  z-index: 0;
}
```

This should help.
