
Disable level 1 link

Posted by xpatval - 2013/04/24 08:53

Hello,

I've got level one link, and sub-levels on my menun, but i don't want the level 1 be used as a normal link.
How can it be possible to "disable" the level 1 link, and keep the access to sub-levels ?

Thanks for your answer

Hello,

Use "Text separator" menu item type for 1st level menu items.

Regards,
ARI Soft

Hum, i don't find the way you said.
I need to specify that i use Ari menu as a joomla component.
I don't find "text separator" in the module management, nor in the menu management.
Could you explain to me , please ?
