change \"on hover\" to \"on click\"

Posted by ioannis79 - 2010/05/02 00:52
_____

Hello and thank you for a quality
free module.

1) I would like the menu to expand on click and not on hover.

Could you suggest a way to do this?

2) The menu has a small problem on IE7. The scroll speed is very slow
compared to mozilla or IE8.
What do you think is the problem?

Thanks in advance.

Ioannis

Hello,

Thanks for your interest in our extension. Regarding your questions, the extension is open source and you can extend it
for your needs, more information about javascript widget which is used by 'ARI YUI Menu' you can find here.

Regards,
ARI Soft
