## Module Class Suffix in ARI YUI Menu

Posted by feezixora - 2010/05/07 03:50

---

1st of all congrats for the great module... this is the module that i have waiting for..  
i have one question.. how to specific the style of the module... i want this module can used with many class suffix. it is possible to do that? or still need to modified the css file in the module folder.

thank u

:cheer:

Hello,

Currently the extension provides ability to change styles only through editing extension CSS file, we are going to add ability using custom themes in a future release.

Regards,  
ARI Soft
