
CSS/PHP Modifications...

Posted by PProTech - 2010/05/10 23:33

Either I couldn't find this in the other topic or more likely, I didn't understand it.

Viewing in Internet Explorer 7 on WinXP.

http://www.ari-soft.com/images/fbfiles/images/IE7_Example.jpg

For some reason that I can't figure out, it is showing a border line on the right side of shorter named sub-menus. We really don't need the border lines on either menu, but definitely not on the sub-menus, but I don't know where to turn them off. Is that in Ari YUI or Joomla itself?

I am building this as a test site and will be able to make it live/accessible once it is approved by the company owners. Thank you for your assistance.

Viewing in Firefox 3.6.3 on Win XP.

http://www.ari-soft.com/images/fbfiles/images/Firefox_Example.jpg

Also, I am trying to find where to change the background colors of the menu & it's drop down to a darker blue (#006699), which means I would need the text white on top of them. We would like the sub-menu to also be Blue with White text to match. I am having trouble locating which CSS files (or js files) to modify.

I am building this as a test site and will be able to make it live/accessible once it is approved by the company owners. Thank you for your assistance.

Hello,

We can help you, if you provide link to page where we can see this issue or HTML source of this page because it looks like a problem with global template CSS rules.

Regards,
ARI Soft
