## Custom styles to first menu item.

Posted by jimijbob - 2013/06/17 21:32

---

Hi there,

I would like to style the first item on the menu with a different background-color, but can not work out how to achieve this. Any advice?

[www.jitwebsite.com](http://www.jitwebsite.com)

Many thanks  
James

Hello,

Use the following CSS rule:

```
LI.yuimenuitem-item101 A.yuimenubaritemlabel
{
  background-color: green !important;
}
```

Hi there,

Thanks so much for your response. Worked a treat. One thing though, I need to make a hover change to the link and background. Could you give me a pointer on this too please.

Many thanks

```
LI.yuimenuitem-item101 A.yuimenubaritemlabel:hover
{
  background-color: yellow !important;
  color: red !important;
}
```
