
Place of the menu

Posted by frlobe - 2010/05/26 11:45

Hello,
I just discover the module ariyuimenu on Joomla 1.5.17. I am happy with the possibilities.
I have a problem with the place of menu. Insetad of being centered in the page, it is placed on the full left position (see file attached). I would as well reduce the lenght of the menu (just the size of the required menus).

I am not able to find in the CSS file where I can change these. Can you help me please?

PS: I cannot show you the website as I am still working on localhost.

Thank you for your answer. <http://www.ari-soft.com/images/fbfiles/files/menu.doc>

Hello,

Try to add the following code into 'CSS Styles' parameter in module settings:

```
BODY DIV.yui-skin-sam {  
position: relative;  
display: -moz-inline-stack;  
display: inline-block;  
zoom: 1;  
*display: inline;  
}
```

Regards,
ARI Soft

Thank you for a so fast answer. I will try this but what do you mean by 'CSS Styles' parameter in module settings ? Is it the menu.css file ? Can I add the lines everywhere in the file ?

I try at the begin of this menu.css file without any success ...

I will continue tomorrow as it is 11pm for me ... Waiting for your tips B)
Thanks again

hello

thank you. So now, it works realle better as the width of the inline menu is reduced as required.

But instead if being fully left, it is now fylly right :angry: . I try to modify "position: relative;" to "position: center;" but nothing changed.

I suppose it is coded in the menu.css file file but where ??? Or in another file ???

Thanks again for your fast and successful support :)

The module uses safe_menu.css file. We can help you if you provide link to page where we can see this issue, because we need to see your template styles and module position.

You can open your site in a browse, choose 'File -> Save as' menu item, save all page files, pack it into archive and send it to us by email and we'll try to help you.
