Include the css in jamba template
Posted by jomel - 2010/05/28 10:40

The css of the module is not working on my template.
For example, the home menu.

Have any idea?

Hello,

Sorry, but it seems your site doesn't contain 'ARI YUI Menu' module. When we open your link in a browser, we don't see the module on your site.

Regards,
ARI Soft

The module can't load necessary CSS file, 500 server occurs for some reason. Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

This is a conflict with your template styles. Your template contains a lot of specific styles for top navigation menu position. Add the following CSS rules to /templates/js_jamba/css/style1.css file that fix it:

```
div#navmenu .yuimenubar ul ul
{
display: inherit;
}

div#navmenu .yuimenu ul
{
top:0;
}

div#navmenu .yuimenu ul li
{
float: none;
margin: 0;
}

div#navmenu .yui-skin-sam .yuimenubar
{
border-style: none;
}

div#navmenu .yui-skin-sam .yuimenubaritemlabel
{
border-style:none;
}

div#navmenu .yuimenubar li,
div#navmenu .yuimenubar .yuimenu li,
div#navmenu .yuimenubar li:hover .yuimenu li {
 background: url(../images/style1/nav_norm_l.png) no-repeat bottom left;
}
div#navmenu .yuimenubar li a,
div#navmenu .yuimenubar .yuimenu li a,
div#navmenu .yuimenubar li:hover .yuimenu li a
 {
 background: url(../images/style1/nav_norm_r.png) no-repeat bottom right;
 color: #fff;
cursor: pointer;
}

div#navmenu .yuimenubar li .yuimenu li:hover,
```

```
div#navmenu .yuimenubar li .yuimenu li.iehover
 {
 background: url(../images/style1/nav_hover_l.png) no-repeat bottom left;
}

div#navmenu .yuimenubar li .yuimenu li:hover a,
div#navmenu .yuimenubar li .yuimenu li.iehover a {
 background: url(../images/style1/nav_hover_r.png) no-repeat bottom right;
 color: #557f01;
}
```

Regards,
ARI Soft

Thank you.

I want to use the style of the module. I'll try to adapt it.

Best Regards,
jomel

I you want to use default menu styles, you can do the following:

1. Open index.php file of your template and replace the following HTML code:

with:

2. Add the following CSS rule to your template CSS file:

```
BODY #navmenu1 .yui-skin-sam
{
  margin: 8px 0pt 0pt 350px;
  float: left;
}
```

Thanks,

One more question,
How can I remove px between various modules?

show the page:http://www.captiare.net/homecaptiare/

Best Regards,
jomel

You are welcome. For your case, use the following CSS rule:

```
DIV#navmenu1
{
  padding: 6px 0 0 10%;
}
```

and remove "margin: 6px 0 0 10%;" CSS property from "body #navmenu1 .yui-skin-sam" CSS rule.

Posted by jomel - 2010/05/28 17:55

Very Good.

Thanks.

How can I assign a different color when the menu is selected?

Best Regards,
jomel

You can use the following CSS rule:

```
body .yuimenubar UL LI A.yuimenubaritemlabel-selected,
body .yuimenubar UL LI .yuimenu UL LI A.yuimenuitemlabel-selected
{
  color: red;
}
```
