

help - template CSS overriding YUI CSS

Posted by hinata93 - 2010/06/03 10:24

Hi,

I've installed the ARI YUI menu but the default styling seems to be overridden by my template CSS. This is causing a bunch of problems - width of parent items expands to accommodate child items (even when child items are not visible) and child items are listed horizontally.

Fyi, I've enabled execution permissions on the css_loaded.php file (set to 755).

Appreciate any advice on how to implement the YUI CSS styling. Thanks!

Current site: www.asetanian.com/joomla/index.php

Current CSS (from template):

```
.top_menu {
width:600px;
height:39px;
    position:relative;
    float: right;
margin:60px 0 0 0;
z-index:999;
}
.top_menu ul {
list-style:none;
padding-top:7px;
margin:0 !important;
}
.top_menu ul li {
float:left;
margin-right:18px;
padding:4px 0 4px 18px;
background:url(..images/dot_menu.gif) repeat-y 0% 0%;
margin-left:-1px !important;
}
.top_menu ul li a{
font-size:13px;
text-transform:none;
color:#5F798F;
font-weight:normal;
text-decoration:none;
}
.top_menu ul li a:hover, #active_menu-nav{
color:#CC0000;
}
```

```
BODY #pillmenu,
#pillmenu .yuimenuubar ul,
#pillmenu .yuimenuubar ul li,
#pillmenu .yuimenuubar ul li a
{
    height: auto;
}
```

```
#pillmenu .yuimenuubar ul {
    width: auto;
}
```

```
#pillmenu .yuimenuubar ul li {
    background: none;
}
```

Hello,

When we try to open your site, FireFox indicates this site as attack site, you can read about it here. Check and fix it, please, that we can help you.

Regards,
ARI Soft

Hi, thanks for the quick reply! Sorry there is a problem with the site, working on getting that fixed. In the meantime, would a screenshot of the navbar be sufficient?

Attached:

- 1-screenshot with inactive navbar
- 2-screenshot with hover over "business" (note: "what we do", "our background" & "our industry" are the child items)

Happy to send you any other files you may require.

Thanks again! http://www.ari-soft.com/images/fbfiles/images/Screen_shot_2010_06_03_at_6.png

Could you open this page in a browser, choose 'File -> Save As' menu item, save all files from this page, archive it and send us by email? It helps us resolve this issue more quickly.

Regards,
ARI Soft
