Current Item highlighting problem

Posted by kriztan - 2010/06/03 10:26

_____

I've tested the option to highlight current items. So everything works fine until moving the mouse over the menu bar. The highlight of the active item disappears permanently on moving the mouse over the menu bar without clicking any sites. I've tested it on firefox 3.6 and IE 7/8 and got the same results.
Can anybody help me?

Thanks Christian

_____

It's normal behaviour of the module. If you want that the module highlight active menu item always, you can submit feature request here and we'll implement this possibility in a future release.

Regards,
ARI Soft
