## ARI YUI Menu on mobile

Posted by Hadrian - 2014/06/02 20:26

---

Hi,  
thanks for great (and free...) module :)

But this menu has one defect: poor works on tablet or smartphone, isn't possibility to tap on second (or next) sub-level.

Is possible to correct this?

Regards,  
Hadrian

Hello,

You can try "ARI Ext Menu" module instead of "ARI YUI Menu".

Thanks for fast reply :)

ARI YUI Menu has a big advantage: possibility operation from keyboard (to sub-level too). Not many menu have those feature (ARI Ext have not), but it is necessary for disabled person, who not use mouse.
