Nav bar background

_____

Hello,

Love the module! Works great!

After reading the forum, I can't seem to find the answer to my question.

I have the menu in my navbar and I would like to change the silver background color to match the same as my bar so it blends in.

How do I do this? I have tried with other css but it only changes the colors of my submenu/child items.

Thanks!   :)

Hello,

Provide link to page where we can see the module on your site, please, that we can help you.

Regards,
ARI Soft
