
Help with width and position of dropdown menu

Posted by skyekr - 2010/06/22 19:51

Here is a link to my site: <http://nationalhealthreview.biz>

I've been successful at changing some things, but can't seem to change the width of the drop-down portion of my top horizontal menu.

PS, thanks for the great product!

Hello,

This is conflict with template CSS styles. Add the following CSS rule to template CSS file that fix this issue:

```
#pillmenu .bd ul .bd ul
{
  width: auto;
}
```

Regards,
ARI Soft
