## Text vertical align of dropdowns

Posted by mana78 - 2010/07/02 15:55

---

Hello to everybody.

Unfortunately i have another problem with CSS and dropdowns.

I tried to set a vertical align middle for the itemlabel for second level and deeper because I changed height of menu. But it does not work.

Would you be so kind as to help me with CSS code for getting this thing done?

Thank you very much in advance.

Best regards.

Peter

Hello,

Add the following CSS rule to 'CSS Styles' parameter in module settings:

```
body #menu2 #{ $id } ul li a.yuimenuitemlabel
{
    line-height: 30px;
    vertical-align: middle;
}
```
