## Image for vertical menu.

Posted by M3f1st0 - 2010/07/13 21:41

---

Thanks first of all for the form that you have accomplished.

I need to place an image before the menu item.

If set in CSS Style the line background-image i see image only first menuitem,

but i'm looking Imagine subsequent lines.

Any suggestions?

Sorry for my English.

Hello,

Unfortunately we can't open your site, check that URL is correct and it's available online.

I checked and seems to work.

Active also the menu that for now and 'disabled so' you can control.

Thanks

I forgot.  
The menu called "Menu\_Laterale"

Use the following CSS rules:

```
.yuimenu UL
{
  padding-left: 0;
}
```

```
.yuimenu UL LI
{
  height: 20px;
  background: url("http://www.peperoncinopiccantefiletto.com/sito/images/menu_arrow.gif") no-repeat scroll left top transparent;
```

---

```
padding-left: 30px;  
list-style: none;  
}
```

Needless to say, it works.

Thanks for the quick response.
