Space between Buttons in horizontal menu

Posted by Ghnaarz - 2010/07/19 15:57

_____

First of all I want to thank you for this great module. I hade some troubles at first but i nearly figured out everything I need by now. Except two things.

1. How do you define the spaces between the buttons? I tried quite a few things but I had to give up after spending too much time.

2. The second problem is almost the same. I need to know how to put some space in between the sublevel menu items. Also I didn't find out how to put a border around the sublevel-buttons themselves, only around the whole sublevel.

3. When hovering over the submenus, it doesn't highlight the whole menu-item, theres still some space on the top and the bottom that remains transparent. I couldn't figure out how to correct this.

The link to my site is: http://www.rockfactory.ch/cura_domizil/
Also I attached a picture of how it is supposed to look to this post.

Thank you very much in advance for helping me.

_____

Hello,

Sorry for delay. You can add the following CSS rules:

```
body #navigation DIV.yui-skin-sam .yuimenu ul
{
 padding: 0;
}

body #navigation DIV.yui-skin-sam .yuimenu .bd
{
 border-style:none;
}

body #navigation DIV.yui-skin-sam .yuimenu ul li
{
  border: 1px solid gray;
  margin: 4px 0;
}
```

Regards,
ARI Soft

Thank you very much! Problem solved.

The delay didn't matter. I wasn't here anyway for a few days =).
