hi, am trying to use YUI or ext menu but getting a blank page.. when i enable either module, the page that gets served only has code for the menu module but nothing else -- so, it displays blank.

any idea what could be causing this?

am running Joomla 1.5.20 with php 5.2.9 and mysql 5.0.77

Hello,

If you provide temporary access to your Joomla! backend by email, we can investigate this issue. It can be conflict with a 3rd party extension.
