Menu Item Change Color On Hover

Posted by bluesbaby - 2010/08/05 07:07

Hello. This is a great mod. I spent 2 days pulling my hair out trying to tweak the extended menu bar and scoured the internet looking for answers. Thankfully I found the yui menu!

I was wondering if there is a way to change a menu items background color when you hover over it. I know there is a way to change the text color on hover but I can't seem to find a way to actually make the background color anything but the standard blue that comes set up with the mod.

Thanks!

Hello,

Try to add the following CSS rule to 'CSS Styles' parameter in module settings:

```
#{$id} .yuimenubar .bd UL LI.yuimenubaritem-selected
{
  background: red none;
}
```

If this doesn't help, provide link to page, please, where we can see the menu on your site.

Regards,
ARI Soft

It worked like a charm! Thank you SO much! Just two more quick questions if you don't mind:

1. I left Remain active menu item checked so that visitors know what page they are on. How do I change the color of that button from the sky blue to another color?

2. How do I get rid of that extra padding on the right side of my menu bar? Currently I have this override in:

```
#ariyuimenu #{$id} .yuimenubarnav .yuimenubaritem
{
 border-right-style: none;
}

#ariyuimenu #{$id}.yui-skin-sam ul li a.yuimenubaritemlabel
{
  text-align: center;
  padding: 0 14px;
  width: auto;
}
```
