Current Link background image

Posted by LMFlores - 2010/08/24 06:29

_____

Hi. I was wondering if it was possible to have a different background image for a menu item who's link is currently showing? The ari yui menu I'm working on is at the top left of this website: http://www.frankmembreno.com/joomla/

I have an example default joomla menu below that which uses a current link background image. It's not in the alignment I want, but it's an example.

Thank you.

_____

Hello,

If 'Remain Active' option is set to 'Yes', active menu item will have CSS class 'yuimenuitemlabel-active'. In other case, it will have CSS class 'yuimenuitemlabel-selected'.

Regards,
ARI Soft

Thank you many times over. I just used the class yuimenuitemlabel-active, assigned it a background, and placed !important on it and it worked.
