
ItemID appended at the end of external link

Posted by elenag - 2010/09/03 07:44

Hi.

I'm having a problem with ARI YUI Menu and External Links. For menu items that they are external links ?ItemID=XXX is appended at the end of the link. The problem is that the external site I'm linking to is also a Joomla site and the ?ItemID=XXX completely breaks it.

Hope someone can help me. Thanks

Hello,

What version of the module you use? We can't reproduce this issue on the latest version (1.0.16).

Regards,
ARI Soft
