
The submenu problem

Posted by pcarcamo - 2010/09/03 17:13

The submenu is behind of the html module (and in the html module a put a javascript). i tried with z-index and it work in localhost but online it did not work u.u

the web : <http://investigacion.unap.cl/cete>

Thank you =(

PD: SOrry for my english =s
