
Documentation

Posted by ranks - 2010/09/21 22:15

Hi, I'm pretty new and inexperienced, so I apologise in advance. I've installed the Ari Yui Menu, and have my menu items in place, but I can't figure out how to stylize it, either through CSS or Module settings. The only thing that works is changing the fonts size???!!

Is there any documentation on how to do this? My site isn't online so I can't get you to take a look at it. I was just wondering if there's any instructions for getting started, and how to reshape, recolour, resize etc.

Thanks so much.

Hello,

Read this post on our forum, please, it contains information about menu styles.

Regards,
ARI Soft
