
problem with menu

Posted by calciodonne - 2010/10/24 12:00

dear sirs

I have installed ari yui menu module. I would like to show horizontal menu with submenu but It is impossible. I see vertical menu. what is the problem?

Hello,

Check that 'Menu direction' parameter is set to 'Horizontal'. If it doesn't help, provide link to page where we can see the issue because it can be problem with site template styles.

Regards,
ARI Soft
